Portrait Descriptions

We have three levels of portrait output to fit your needs and life style.

The Special – The foundation of all of our portraits

This portrait is beautiful. It is individually color-balanced, edited, cropped and printed at our professional color and imaging lab. Teeth are whiter, eyes are bright and clear, stray hairs are removed, small blemishes gone. This portrait is ready for framing under glass.

Delivery: Two weeks from placing order.

The Elite

The Elite portrait output begins with the same quality portrait as The Special. It is then applied to a sturdy foam core for durability and longevity then sprayed with a protective clear coating. This portrait is also ready for framing. It does not require the protection of glass. To dust, simply wipe with a clean dry cloth.

Delivery: Two weeks from placing order.

The Masterpiece

The Masterpiece will have you asking “Is it a painting or a photographic portrait?” These portraits are truly an heirloom. The foundation of the Masterpiece begins as all of our portraits do; with a “Special” treatment; blemishes and imperfections removed, individually color-balanced, printed on high quality professional paper, and then applied to real canvas that is stretched on a sturdy wood stretcher frame. It is sprayed for a life-time + protection. This beautiful portrait is ready for professional framing. No need for glass to hide the beauty of this portrait. Simply dust with a clean dry cloth. Make sure to have a special place in your home for this piece of art!

Delivery: One month from placing order
